# RF Exposure Evaluation Report

APPLICANT : Quectel Wireless Solutions Co., Ltd.

**EQUIPMENT**: Smart Module

**BRAND NAME**: Quectel

MODEL NAME: SC20-W

FCC ID : XMR201709SC20W

STANDARD : 47 CFR Part 2.1091

We, Sporton International (KunShan) INC., would like to declare that the device has been evaluated in accordance with 47 CFR Part 2.1091, and pass the limit. Without written approval of Sporton International (KunShan) INC., the test report shall not be reproduced except in full.

Report Issued Date : Aug. 30, 2017

Report No. : FA741007-02

### 4. RF Exposure Limit Introduction

According to ANSI/IEEE C95.1-1992, the criteria listed in Table 1 shall be used to evaluate the environmental impact of human exposure to radio frequency (RF) radiation as specified in §1.1310.

| Frequency range<br>(MHz) | Electric field strength (V/m) |                               |                      | Averaging time<br>(minutes) |  |
|--------------------------|-------------------------------|-------------------------------|----------------------|-----------------------------|--|
| 700 — - 200<br>s         | (A) Limits for O              | ccupational/Controlled Expo   | sures                |                             |  |
| 0.3-3.0                  | 614                           | 1.63                          | *(100)               | 6                           |  |
| 3.0-30                   | 1842/                         | f 4.89/                       | f *(900/ <b>f</b> 2) | 6                           |  |
| 30-300                   | 61.4                          | 0.163                         | 1_0                  | 6                           |  |
| 300-1500                 |                               |                               | f/300                | 6                           |  |
| 1500-100,000             |                               |                               | 5                    | 6                           |  |
|                          | (B) Limits for Gene           | ral Population/Uncontrolled I | Exposure             |                             |  |
| 0.3-1.34                 | 614                           | 1_63                          | *(100)               | 30                          |  |
| 1.34-30                  | 824/                          | f 2.19/                       | f *(180/f2)          | 30                          |  |
| 30-300                   | 27.5                          | 0.073                         | 0.2                  | 30                          |  |
| 300-1500                 |                               |                               | f/1500               | 30                          |  |
| 1500-100,000             |                               | 9 .                           | 1.0                  | 30                          |  |

The MPE was calculated at 20 cm to show compliance with the power density limit.

The following formula was used to calculate the Power Density:

$$S=\frac{PG}{4\pi R^2}$$

Where:

S = Power Density

P = Output Power at Antenna Terminals

G = Gain of Transmit Antenna (linear gain)

R = Distance from Transmitting Antenna

Note: For conservativeness, the lowest frequency of each band is used to determine the MPE limit of that band.

Report No. : FA741007-02

#### 5.2. Collocated Power Density Calculation

|             | Power Density / Lim | $\Sigma$ (Power Density / Limit) of 2.4GHz WLAN+5GHz WLAN+Bluetooth |       |
|-------------|---------------------|---|-------|
| 1           | 2                   | 3   | 1+2+3 |
| 2.4GHz WLAN | 5GHz WLAN           | Bluetooth   | 17273 |
| 0.018       | 0.013               | 0.003   | 0.034 |

**Note:**  $\Sigma$  (Power Density / Limit): This is a summation of [(power density for each transmitter/antenna included in the simultaneous transmission)/ (corresponding MPE limit)].

#### **Conclusion:**

Based on 47 CFR §2.1091, the analysis concludes that this product is compliant with the FCC RF exposure requirements in mobile exposure condition.
